SUBJECT: J. L SHEPHERD & ASSOCIATES

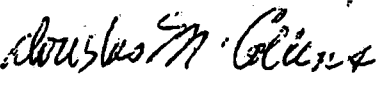

Dear Ms. Scheffield:

This is in response to your telephone request of March 3, 1999. We have reviewed J. L. Shepherd's State of California Materials License No. 1777-19 and discussed it with State of California personnel cognizant of this license. We agree that the referenced license is suitable for the project described in your fax dated March 1, 1999, provided that the licensee files for reciprocity recognition pursuant to 10 CFR 150.20 with our Region IV office in Arlington, Texas, at least three days prior to the beginning of the project.

You are reminded that a record showing negative leak test results within six months prior to removing the device from storage must be available for inspection and transfer to the licensee. Your prompt notification of the scheduled date of the project will be appreciated, as we plan to have an inspector at the site to oversee the project.

If you have any questions regarding this letter or the project, please contact us.

Sincerely,

for 

Mark S. Lesser, Chief
Materials Licensing/Inspection Branch 2
Division of Nuclear Materials Safety

454550
